

ALIAKSANDR KANONIK

UNITY DEVELOPER

ABOUT ME

Unity Developer with 5+ years of commercial experience building mobile, VR, and WebGL games from prototype to release and live operations. Experienced in gameplay architecture, performance optimization, SDK integration (Ads, IAP, Analytics), and scalable gameplay systems. Contributed to games with over 40+ million combined downloads and shipped projects for Android, iOS, WebGL, Meta Quest

SKILLS

Core: C#, Unity

Platforms: Mobile (Android / iOS), Oculus Quest 2/3, WebGL

Gameplay & Systems: Gameplay Systems, Meta-game Systems, AI Systems, Localization, Save/Load Systems, Progression Systems, UI Integration, Asset Integration, Animation Integration, VFX Integration, SFX Integration, Shader Graph, Addressables

Architecture: Clean Architecture, Architecture Design, SOLID, Design Patterns (GoF), OOP, ECS (DOTS, Entitas), Dependency Injection (Zenject, VContainer)

Performance: Performance Optimization, CPU Optimization, Memory Optimization, Size Optimization, Profiling

SDK & Services: Ads Integration, In-App Purchases, Analytics Integration, Firebase Analytics, A/B Testing

Tools: UniTask, R3, DOTween, Photon(PUN2), Git, Rider, Jira, JetBrains AI Assistant, Cursor, OpenAI Codex, Unity AI

WORK EXPERIENCE

Appercut | July 2024 – Present

Unity Developer

Working on live mobile games for Android and iOS with a combined 40M+ downloads.

Responsibilities & Achievements

- Developed games from concept and prototype through release and post-launch support.
- Participated in gameplay design discussions, feature planning, A/B testing, and technical decision-making together with Product Owners.
- Chose and designed application architecture during the prototyping stage for new projects.
- Implemented gameplay, meta-game, AI, localization, save/progression, and LiveOps systems.
- Integrated game assets provided by artists, including 3D models, animations, VFX, SFX, and UI.
- Integrated third-party SDKs, including Ads, In-App Purchases, and Analytics.
- Refactored gameplay architecture from OOP to ECS to improve scalability and maintainability.
- Identified and resolved CPU, memory, and performance bottlenecks on mobile platforms.
- Collaborated closely with designers, artists, QA engineers, and developers throughout production and post-release support.

Projects:

- [Meme Bots: Brainrot Chase Rooms - Play Store](#)
 - [UwU: Go Impact - Video Demo](#)
 - [Horse Land - Play Store](#)
 - [Horse Escape - Play Store](#)
 - [I Am Street Guy - Play Store](#)
-

Abelana VR Poland | April 2021 - July 2024

Unity Developer

Developed multiplayer educational and simulation products for VR headsets (PC VR & Standalone) and mobile / WebGL platforms.

Responsibilities & Achievements

- Developed core gameplay and interaction systems
- Worked with multiple hardware platforms (Quest, Pico, HTC, WMR)
- Optimized performance for Standalone VR devices
- Integrated UI, input systems, and platform-specific features
- Maintained large codebase and delivered features across several products
- Participated in code reviews and mentored junior developers

Projects:

- [BlitzBullet - Video Demo](#)
 - [Visceral Science VR - Video Trailer](#)
 - [Near the Speed of Light - Video Trailer](#)
 - [Atom Maker - Video Trailer](#)
 - [Gravity Simulator - Video Trailer](#)
-

Iridescent Studio | March 2021 - April 2021

Junior Unity Developer

Unity Developer in a small agile team during one-month hackathon.

Responsibilities & Achievements

- Rapid prototyping under tight deadlines

Projects:

- [Inhabitable Planets - Video Demo](#)
 - [Habitable Donuts - Video Demo](#)
 - [LockIn - Video Demo](#)
 - [Rubic Sphere - Video Demo](#)
 - [Runner Coin - Video Demo](#)
 - [Flying Card - Video Demo](#)
-

PERSONAL PROJECTS

Toweris VR - Virtual Reality puzzle adventure for Meta Store

Meta Horizon Worlds (Outpost Watch) - built a project during a Meta hackathon on Meta's VR/mobile platform.
