SKILLS

Platforms:

- Mobile (Android / iOS)
- WebGL
- Oculus Quest 2/3
- Desktop VR

Core:

- Unity, C#
- Gameplay Programming
- Game Optimisation

Architecture:

- SOLID, GoF
- DI (Zenject, VContainer)
- ECS (Entitas, DOTS)
- DoTween

Async / Optimization:

- UniTask
- R3

Tools:

- Git
- Jira
- Rider IDE

AI-Assisted Development:

- JetBrains AI Assistant
- OpenAI Codex
- Cursor
- Antigravity
- Unity AI

LANGUAGES

- Russian (Native)
- English (B2 - Upper-Intermediate)
- Polish (B1 - Intermediate)

EDUCATION

MASTER'S DEGREE

Aliaksandr Kanonik

UNITY DEVELOPER

Unity Developer with 5+ years of commercial experience in mobile, VR, and WebGL game development.

Strong focus on scalable gameplay systems, clean architecture, and performance optimization.

EXPERIENCE

Unity Developer | Appercut

July 2024 – Present

Working on casual mobile games for Android and iOS with a total of 40M+ downloads.

Responsibilities:

- Designed and implemented gameplay and meta-game systems for live mobile titles
- Improved code quality through architecture refactoring and code reviews
- Participated in feature planning, estimation, and technical discussions
- Took ownership of multiple core systems, including Localization, AI, Gameplay, Save/Progression, and LiveOps-related features
- Migrated gameplay systems from OOP architecture to ECS to improve scalability and maintainability
- Identified and resolved performance bottlenecks on mobile platforms
- Collaborated closely with designers, artists, QA, and other developers

Projects:

- [Meme Bots: Brainrot Chase Rooms - Play Store](#)
- [UwU: Go Impact - Video Demo](#)
- [Horse Land - Play Store](#)
- [Horse Escape - Play Store](#)
- [I Am Street Guy - Play Store](#)

Unity Developer | Abelana VR Poland

April 2021 - July 2024

Developed multiplayer educational and simulation products for VR headsets (PC VR & Standalone) and mobile / WebGL platforms.

Responsibilities:

- Developed core gameplay and interaction systems
- Worked with multiple hardware platforms (Quest, Pico, HTC, WMR)
- Optimized performance for Standalone VR devices
- Integrated UI, input systems, and platform-specific features
- Maintained large codebase and delivered features across several products
- Participated in code reviews and mentored junior developers

Projects:

- [BlitzBullet - Video Demo](#)
- [Visceral Science VR - Video Trailer](#)
- [Near the Speed of Light - Video Trailer](#)
- [Atom Maker - Video Trailer](#)
- [Gravity Simulator - Video Trailer](#)
- [Visceral Science Web - Project Link](#)
- [Near the Speed of Light Web - Project Link](#)

Unity Developer | Iridescent Studio

March 2021 - April 2021

Unity Developer in a small agile team during one-month hackathon.

Responsibilities:

- Rapid prototyping under tight deadlines
- End-to-end feature development

Projects (gameplay prototypes and not released projects):

- [Inhabitable Planets - Video Demo](#)
- [Habitable Donuts - Video Demo](#)
- [LockIn - Video Demo](#)
- [Blitz Bullet - Video Demo](#)
- [Rubic Sphere - Video Demo](#)
- [Runner Coin - Video Demo](#)
- [Flying Card - Video Demo](#)
